

HOLCOMBE MEDICAL: DIRECT PRIMARY CARE OVERVIEW

Ideally, we start with a face-to-face visit, then most care is conducted through video or voice consultations. Sometimes the initial face-to-face visit is not practical and not required.

Dr Holcombe will answer questions, give probable diagnoses for symptoms as described, manage chronic conditions, provide realistic wellness suggestions, and order labs and radiology routinely, or as needed, and prescribe medications long-term, or as needed.

This is often done the same day, or within 72 hours.

A contract is signed between the patient and Dr Holcombe, a monthly fee is paid by the patient to Dr Holcombe, and any emergency at-home care can be discussed as the need arises, but that would require a separate fee for that particular service.

There is NO long-term contractual obligation: Either party can cancel with one month's notice, at any time, for any reason (or no reason!).
